High speed and quality

- Short tubes : **up to 100 p/min.**
- Long tubes : **up to 60 m/min (180 Ft/min).**
- Perfect core line up.
- No damage on the cores (plastic straps).
- Constant straps tension.

Programming

- Programming on a key pad.
- Easy programming
 - Number of rows.
 - Number of layers (single or double).
 - Number of straps (programmable distance).
 - Single or double pallet.
- Linking with computer possible.

Advantages

- Building of the pallet on the floor (no need of a fork lift).
- No adjustment for different diameters (vacuum lifter).
- Possibility to build two pallets on the same time (short length).
- No operator for core handling.
